

## Corporate Capabilities

Masser Technologies (MT) is a skilled managed security service provider (MSSP) with experience delivering remote and onsite customer service across the country. For nearly 20 years, MT has supported its clients with IT endpoint, network design/operation, IT help desk, and project management services with a strong emphasis on security.

We support commercial, local, state, and federal contracts.

## Our Approach

We offer complete IT Outsourcing and security-related services through our MSSP approach with comprehensive Help Desk Outsourcing solutions to provide users with the quality technical support they require to empower their operations.
