

Corporate Capabilities

Masser Technologies (MT) is an experienced IT project and Managed Security Service Provider with experience delivering nationwide remote and onsite customer service. For nearly 20 years, MT has supported its clients with IT endpoint, network design/operation, IT help desk, VTC, and project management services with a strong emphasis on security. We support multiple Army contracts in educational and division command environments.

Our Approach

We offer complete IT project and security-related services through our comprehensive IT Networking and Help Desk solutions to provide users with the qualified technicians and support required to ensure operability and end-user satisfaction.

Differentiators

- ✓ Nearly 20 years of continual growth
